# IOT + BIG DATA

A surgeon in an operating room is using a tablet to view a 3D anatomical model of a patient's skull and brain. The surgeon is wearing blue scrubs and white gloves. The tablet is held in front of the patient's head, which is covered in a blue surgical cap. The background shows the operating room environment, including a surgical light and various medical equipment.

**REALIDAD AUMENTADA**

A close-up photograph of a surgeon in a blue scrub suit and surgical cap, wearing a white VR headset. The surgeon's eyes are visible through the headset's lenses, which show a virtual 3D anatomical model of a human head. In the background, another person in a surgical cap is partially visible, and medical equipment with red digital displays showing 'PDE 05 21' is present.
